

<b>Course title</b>	<b>Clinical Specialties: Rheumatology, Orthopaedics, Dermatology</b>			
<b>Course code</b>	<b>GEMD-401</b>			
<b>Course type</b>	Required			
<b>Level</b>	Undergraduate			
<b>Year / Semester</b>	Year 4 / Semester 7/8 (rotation)			
<b>Teacher's name</b>	Course Leads: TBA			
<b>ECTS</b>	60	<b>Teaching Periods per Week</b>		
		<b>Large Group Learning</b>	<b>Small Group Learning</b>	<b>Clinical Practice</b>
		6	2	30
<b>Course purpose and objectives</b>	<p>The main objectives of the last two years of the five-year medical programme are to provide students with extensive experience in the clinical environment, mainly in hospitals but also in the community, so that they can utilise their learning over the previous three years to practise their clinical, communication, diagnostic and reasoning skills on real patients, and to learn about the management of patients, from a medical, therapeutic, surgical, psychosocial and caring perspective.</p> <p>In this course, students will spend five weeks working primarily with patients with musculoskeletal, orthopaedic and skin disorders. They will develop an understanding of the presentation, signs and symptoms, physical examination findings, investigations, diagnosis, treatment (medical and/or surgical, including plastic surgery, as appropriate) and management plan for common musculoskeletal, orthopaedic and skin disorders.</p> <p>The students will learn how to take detailed histories from, carry out systematic clinical examination of, and interpret laboratory and imaging data on patients with disorders of the musculoskeletal and integumentary systems and on patients requiring orthopaedic surgery. The students will gain a basic understanding of the application and type of information to be obtained from different methods for investigating musculoskeletal and skin disorders. They will also spend time in theatre observing musculoskeletal, orthopaedic and dermatological operations and plastic surgery.</p>			
<b>Learning outcomes</b>	<p>By the end of the course the students should be able to:</p> <ol style="list-style-type: none"> <li>1. take a focused history from a patient, or relative of a patient, presenting with a musculoskeletal, orthopaedic or skin disorder, in a sensitive and caring manner.</li> <li>2. carry out a sensitive physical examination as part of investigation of the presenting complaint.</li> <li>3. discuss a differential diagnosis for the presenting complaint.</li> <li>4. apply their knowledge of basic and clinical science to identify and explain appropriate investigations, including blood and urine tests, nerve conduction</li> </ol>			

	<p>tests, imaging, joint aspiration and biopsy to assist in the diagnosis of the presenting complaint and to interpret the results from such tests.</p> <p>5. prepare and explain a treatment management plan for the patient to present to the responsible clinician to include medical, pharmacological, surgical options as appropriate.</p> <p>6. observe, and where appropriate, carry out or assist with, medical and surgical procedures relating to patients with rheumatological, orthopaedic and dermatological conditions, planned and opportunistic.</p> <p>7. Prescribe medications to treat patients with disorders of the joints, muscles, ligaments and skin make appropriate therapeutic/management decisions.</p>																																		
<b>Prerequisites</b>	None	<b>Required</b>	None																																
<b>Course content</b>	<p>Common presentations affecting the musculoskeletal system and skin including:</p> <ul style="list-style-type: none"> <li>○ Rheumatoid and osteoarthritis</li> <li>○ Connective tissue disorders</li> <li>○ Disorders of bones and joints</li> <li>○ Fractures, dislocations and ligament injuries</li> <li>○ Disorders of the foot and spine</li> <li>○ Skin disorders and infections</li> <li>○ Sarcomas and skin cancer</li> <li>○ Burn management and wound healing</li> <li>○ Sports Medicine injuries</li> </ul>																																		
<b>Teaching methodology</b>	The course is delivered by clinical placements, lectures, tutorials, case studies and group discussions.
