

Course Title	Health Inequality within and between countries				
Course Code	MPH-532				
Course Type	Elective				
Level	2 nd Cycle				
Year / Semester	2 / 3				
Teacher's Name	Dr Premila Webster				
ECTS	10	Lectures	12	Interactive learning activities	15
Course Purpose and Objectives	<p>The main objectives of the course are to:</p> <ul style="list-style-type: none"> • Demonstrate deep understanding and describe the basic features of health inequality both within and between countries and provide an overview of the social determinants of health, describing in detail the excess morbidity and mortality resulting from these, as well as their contribution to health inequality. • Demonstrate deep understanding and describe in detail the different models of aetiological pathways used to explain health inequality both within societies and between countries. 				
Learning Outcomes	<p>After completion of the course students are expected to be able to:</p> <ol style="list-style-type: none"> 1. Demonstrate deep understanding and describe the basic features of health inequality both within and between countries. 2. Provide an overview of the social determinants of health and describe in detail the excess morbidity and mortality resulting from these, as well as their contribution to health inequality. 3. Describe in detail geographical inequalities in health both within and between countries. 4. Describe in detail socioeconomic (social class, educational attainment, income/wealth) inequalities in health both within and between countries. 5. Describe in detail ethnic inequalities in health within societies. 6. Describe in detail gender inequalities in health within countries. 7. Describe in detail inequalities in access to healthcare both within and between countries. 8. Demonstrate deep understanding and describe in detail the different models of aetiological pathways used to explain health inequality within societies, including the psycho-social model, the materialist model, the behavioural/cultural model, the access to healthcare model, and the life-course model, and critically evaluate the strengths and limitations of each. 9. Demonstrate deep understanding and describe in detail the different models of aetiological pathways used to explain health inequality between countries, including poverty and affluence, income inequality, literacy and education (and health education), access to and organization of healthcare, and critically evaluate the strengths and limitations of each approach. 10. Describe in detail governmental initiatives and social policies put 				

	<p>forward in different countries around the world (e.g. UK, Sweden, The Netherlands, USA, Australia, South Africa) for tackling health inequality within their societies.</p> <p>11. Describe in detail inter-governmental initiatives and policies from the WHO and other organizations put forward for tackling health inequality at the global level.</p> <p>12. Design programmes and devise policies for tackling health inequality both within and at a global level.</p>																							
Prerequisites	MPH-511, MPH- 512, MPH- 513, MPH- 521, MPH-531, MPH-523.	Required	None																					
Course Content	<ol style="list-style-type: none"> 1. Introduction to Health Inequality 2. The social determinants of health and disease 3. Geographical inequalities in health 4. Socioeconomic inequalities in health 5. Ethnic inequalities in health 6. Gender inequalities in health 7. Inequalities in access to healthcare 8. Models of aetiological pathways for explaining health inequality within societies 9. Models of aetiological pathways for explaining health inequality between countries 10. Tackling health inequalities at the country level 11. Tackling health inequalities at the global level 12. Designing programmes and policies for tackling health inequality within and between countries. 																							
Teaching Methodology	This programme is delivered via distance learning (online) and includes recorded lectures, interactive online tutorials (Webinars) and discussion forums, as well as online exercises and other activities.
