

Course Title	Social and Behavioural Dimensions of Health				
Course Code	MPH-535				
Course Type	Elective				
Level	2 nd Cycle				
Year / Semester	2 / 3				
Teacher's Name	Dr Costas Constantinou Dr Eirini Kampriani Prof Alexia Papageorgiou Dr Stelios Georgiades				
ECTS	10	Lectures	13	Interactive learning activities	16
Course Purpose and Objectives	<p>The main objectives of the course are to:</p> <ul style="list-style-type: none"> • Explain the social and psychological/behavioural dimensions of health. • Equip students with the knowledge and skills to apply sociological and psychological principles to explain health-related behaviours and the experience of disease and treatment in groups of people. • Equip students with the skills to apply models of predicting health-related behaviour among groups of people and devising intervention programs in improving and maintaining health-related behaviour. 				
Learning Outcomes	<p>After completion of the course students are expected to be able to:</p> <ol style="list-style-type: none"> 1. Explain social and psychological theories of behaviour at the population level. 2. Explain how lay health beliefs and beliefs about the causes of illness are formed and shaped from childhood to adulthood. 3. Analyse how lay health beliefs and attitudes can influence health-related behaviour and the experience of illness and treatment. 4. Critically evaluate various concepts of health and wellbeing in populations. 5. Explain the experience of living with a stigmatising condition, the mechanism of labelling, the types of stigma and the different situations of stigmatisation. 6. Analyse the social dimensions of chronic illness. 7. Critically evaluate the main features of the concepts 'the sick role' and 'biographical disruption'. 8. Analyse and explain how the body is shaped by social forces and values and describe the concept of "embodiment". 9. Justify why hospitals are considered social institutions 10. Analyse the concept of iatrogenesis. 11. Relate social capital and health. 12. Analyse the social dimensions of mental illness. 13. Analyse the social aspects of dying, death and bereavement. 				

	<ol style="list-style-type: none"> 14. Distinguish between social and biological death, explain the changes in the perception of death, and critically evaluate cultural differences in these around the world. 15. Analyse the process of medicalisation of death. 16. Analyse and explain the terms 'awareness context' and 'good death' in a social context. 17. Apply Medical Sociology principles to explain and tackle public health issues. 18. Evaluate the social dimension of policy initiatives involving community-wide (or nationwide) disease-preventing and health promotion measures (e.g. smoking ban and educational programmes) and analyse the implications for the successful implementation of such programmes 19. Evaluate the social dimension of nationwide (or global) initiatives for health protection (e.g. immunization programmes) and analyse the implications for the successful implementation of such programmes 20. Explain behaviour at a group level in response to illness and treatment. 21. Relate risk-taking behaviour to health at a group level. 22. Analyse the main determinants of health-related behaviour at a group level, in the developed and developing world. 23. Relate and contrast the concepts of mindfulness, health consciousness, locus of control, and denial in the context of health-related behaviours. 24. Explain how health-related behaviours are formed in childhood and carry on in adulthood. 25. Apply models for predicting health-related behaviours, such as dietary choice, leisure-time physical activity, alcohol consumption and smoking. 26. Devise and apply intervention programmes for modifying and improving health-related behaviours. 27. Devise and apply programmes for maintaining beneficial change in health-related behaviour. 		
Prerequisites	MPH-511	Required	None
Course Content	<ol style="list-style-type: none"> 1. The theoretical perspectives of human behaviour 2. Lay health beliefs and illness behaviour 3. Chronic illness and disability experience and the concepts of health and wellbeing in a social context 4. The body as social entity 5. Hospitals as social institutions 6. Social capital and public health 7. Social dimensions of mental illness in the context of public health 8. Social dimensions of death and dying in the context of public health 9. Applied Medical Sociology 		

	<p>10. Behaviour in illness and treatment</p> <p>11. Risk-taking behaviour relevant to health</p> <p>12. Main determinants of health-related behaviour in the developed and developing world</p> <p>13. Origins and prediction of health-related behaviour</p> <p>14. Intervention programmes for modifying, improving and maintaining behaviours related to health</p>																														
Teaching Methodology	This programme is delivered via distance learning (online) and includes recorded lectures, interactive online tutorials (Webinars) and discussion forums, as well as online exercises and other activities.
