

Course Title	Research Project				
Course Code	MPH-596				
Course Type	Elective				
Level	2 nd Cycle				
Year / Semester	2 / 3				
Teacher's Name	Dr Ourania Kolokotroni				
ECTS	20	Lectures	0	Interactive learning activities	6
Course Purpose and Objectives	<p>To provide students with the opportunity to apply the research methodologies and skills acquired throughout the programme by conducting an independent research project aiming at dealing with a topic of Public Health importance.</p> <ul style="list-style-type: none"> • Work independently under the supervision of an experienced academic in order to conduct their own research project in the context of Public Health. • Write up the project's results as a scientific paper at the standards of international peer-reviewed scientific Journals and prepare a short and precise oral presentation based on the project's results at the standards of international conferences. 				
Learning Outcomes	<p>After completion of the course students are expected to be able to:</p> <ol style="list-style-type: none"> 1. Identify and examine gaps in knowledge in topics of public health importance. 2. Perform a literature review and critically evaluate the existing evidence on a given topic. 3. Devise research aims and objectives. 4. Design the appropriate study for answering the project's objectives. 5. Apply for bioethical approval to the relevant local committees. 6. Recruit a sample from a source population. 7. Identify and examine the right tools (or design new ones) for assessing the key factors (variables) of interest. 8. Perform the appropriate statistical analysis using the right means and appropriately present the results. 9. Derive appropriate conclusions from the study's findings, as well as identify and critically appraise the strengths and limitations of the study. 10. Write up the project's results as a scientific paper at the standards of international peer-reviewed scientific Journals. 11. Prepare a short and precise oral presentation based on the project's results at the standards of international conferences. 				
Prerequisites	MPH-511, MPH- 512, MPH- 513, MPH- 521, MPH-522, MPH-523, MPH- 590	Required	None		

Course Content	<ol style="list-style-type: none"> 1. Bioethics application: Under the supervision of an experienced academic from the Medical School's Department of Primary Care and Population Health, students will have to prepare a bioethics application for approval by the University of Nicosia Research Ethics Committee (REC) and the Cyprus National Bioethics Committee (CNBC), as well as the local Bioethics Committee in the place of study conduct, if this is required by the local laws and regulations. 2. Scientific article: Under the guidance of their supervisor (see above), students will have to write up their project in the form of a scientific paper following the structure of the per-reviewed <i>International Journal of Public Health</i>. 3. Oral presentation: Under the guidance of their supervisor (see above), students will have to prepare a short (5-minute) oral presentation of their project and findings following the guidelines of an international Public Health conference. 																				
Teaching Methodology	This programme is delivered via distance learning (online) and includes recorded lectures, interactive online tutorials (Webinars) and discussion forums, as well as online exercises and other activities.
