BAUSCH+LOMB
Dear colleagues

On behalf of the organising committee I would like to welcome you to our 2018 annual congress.

As always, we are extremely grateful for the effort made by our overseas speakers who take time out their busy lives to attend and contribute to our meeting. Without their participation the impact of all our efforts would be greatly diminished.

As you may have noticed, this year, we have increased the number of contributions made by medical students and doctors in training. The Alistair Fielder Prize in Ophthalmology is becoming ever more popular, and the presentations made each year by the junior members of our cohort have been some of the most refreshing and stimulating. We feel that this group of aspiring ophthalmologists should be given the opportunity to inspire and be inspired.

Another new addition to the program this year is the Pantheo Foundation Lecture. We have for the past three years donated all proceeds from our meeting to the Foundation. Support for its work is growing steadily and this year we have taken on a new medical student. The named lecture series we hope will help promote the Foundation’s aims. Knowing how busy he is and how many invitations he receives yearly, we are very honoured that Sir Peng Khaw is giving the first of these lectures.

Finally, as always, the aim of this weekend is not just to work and learn, but also to take the time to form bonds and friendships that we hope will last well beyond this meeting.

ACRYSOFT® IQ PANOPTIX™
PRESBYOPIA-CORRECTING IOL

Designed for more natural adaptability

Featuring ENLIGHTEN (ENhanced LIGHT ENergy) Optical Technology to mimic the performance of a healthy crystalline lens, the AcrySof® IQ PanOptix™ IOL is the natural choice for advanced presbyopia correction:

Optimized light utilization in a presbyopia-correcting IOL
Transmits 88% of light* to help provide crisp quality of vision at all distances.1,2

Designed for more comfortable near to intermediate range of vision
Designed to provide a more natural focal point of 60 cm, which is preferred for real-life tasks, such as computer work, over the 80 cm distance offered by other trifocals.3,5

Less dependence on pupil size
Features a 4.5 mm diffractive zone designed for optimized performance in all lighting conditions.3

The AcrySof® IQ PanOptix™ IOL is designed to approximate youthful vision to help patients adapt more naturally to their visual preferences.3,4
